RE : 8920 Anahola Place (Mike Zeanchock)

City of Diamondhead

In regards to above property I would not have any issue with car port being constructed provided the drainage from roof drains is discharged onto that property.

RE: Request for Variance – Response to Questions.

We have attached an application for a variance to request the following. We would like to add a carport on the SW side of our house. It would be within 2' of property line on south corner and 3' on West corner. The adjoining property is an empty lot owned by neighbor.

We also would like to place a screen room on opposite side of house. One corner would be within 3' and North corner would be over 5 feet. Map and drawing also attached.

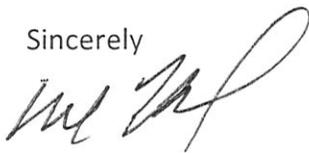

We have purchased the car port and screen room from a reputable contractor known to provide quality products and workmanship.

We greatly appreciate you consideration to this matter.

Answer/ Explanation to questions on Page 2

1. I believe the special conditions would only affect the structure in question. There are no other structures close to proposed structure in question. The adjoining property on SW side is an empty lot and The NE side has plenty of room between structures with a drainage swall separating the two.
2. In my opinion it would deprive us as owners of rights enjoyed by others that have similar or same structures on their property. We have chosen a quality product and professional installer to build structures. These structures would enable us to enjoy the outside area of our property and add to the overall value of property.
3. I believe there are no special circumstance that I see created by the owner in this situation. We have a V shaped lot which unfortunately is wider at the rear and not where structures are proposed.
4. NO we do not believe so; I have seen some of the same situations exist without the space between properties that exist here. Our neighbors also have no concerns with structures.

Sincerely

Michael Zeanchock
